P.O. Box 19276
Springfield, Illinois 62794-9276

Refer to: 2010300074 – Winnebago County
Southeast Rockford Groundwater Contamination NPL Site
Superfund/Technical

Dear Mr. Conrath:

The U.S. Environmental Protection Agency (EPA) has received your letter dated September 17, 2018, regarding the request for concurrence from EPA that the remedial action activities are complete at Source Area 4 of the Southeast Rockford Groundwater Contamination (SERGC) Superfund site.

EPA agrees with the information presented in your letter and finds it appropriate to begin shut down and decommissioning of the leachate system at Source Area 4. This determination is based upon the achievement of the Source Area 4 remedial action goals. Once the system is shut down and decommissioning is complete, please provide to EPA a comprehensive Remedial Action Completion Report (RACR) for Source Area 4. Once the RACR is submitted, reviewed, and approved, the remedial action activities at Source Area 4 will be considered complete.

I look forward to our working together to complete the remaining elements of the site remedy. If you have any questions or require further information, please contact me at (312) 353-4669 or via electronic mail at kirchner.karen@epa.gov.

Sincerely,

Karen Kirchner

Remedial Project Manager
US EPA, Region 5, Superfund Division
